**NO.DIR/I&R/PIS/EDU/GOS( 496 )/2025 Dated: 22-02-2025**

**The Principals/ Administrators,**  
All Privately Managed Educational Institutions,  
Sindh.

**SUBJECT: - TREE-PLANTATION IN PRIVATELY MANAGED EDUCATIONAL  
INSTITUTIONS AND ALL-AROUND AREAS.**

Environmental pollution and global warming/climate change have become undeniable global concerns. In pursuit of material comforts and enjoyment, people often overlook the hazards posed to the environment. The depletion of trees and deforestation have significantly contributed to climate change, making weather conditions increasingly severe. This has led to a decline in oxygen levels in the atmosphere, reducing the ability to absorb carbon dioxide and purify the air. Furthermore, it contributes to the buildup of greenhouse gases, disrupts the water cycle, and increases the risk of drought.

We all recognize the vital role that trees and plants play in purifying the air, allowing us to breathe fresh and healthy air. Tree plantation has now become a global movement, with people enthusiastically participating in afforestation efforts. The School Education & Literacy Department, Government of Sindh, has taken the initiative to ensure the success of this program. As responsible members of Sindh's society, we must actively contribute to this cause. By participating in tree plantation efforts, we can help combat climate change, improve air quality, cool urban areas, conserve water, and prevent pollution and droughts.

In this regard, the Honourable Minister for Education & Literacy, Government of Sindh, has directed the launch of a tree plantation campaign in privately managed educational institutions. Moreover, efforts must be made to raise awareness among students about the importance of tree plantation.

Therefore, you are advised to initiate a campaign on the benefits of tree plantation in schools and surrounding areas following the upcoming spring season. This initiative is crucial for safeguarding the health and future of the next generation.
